SUMMARY

- Proficient in designing, implementing, and maintaining robust backend systems and AI-driven data pipelines.
- Demonstrated capability to identify and resolve complex technical challenges.
- Skilled at identifying and resolving complex technical and computational challenges in AI and backend development.
- Adaptable professional capable of moving seamlessly between backend engineering, AI experimentation, and problem-solving roles

EDUCATION

Babcock University – Ogun, Nigeria

September 2022– Now

BSc, Computer Science.

Current CGPA : **4.56/5**

WORK EXPERIENCE

Junior Back-End Developer

Infometrics – Lagos, Nigeria

May 2022 - Now

- Active participation in code reviews, debugging sessions, and sprint planning meetings, gaining valuable insight into industry best practices and Agile development methodologies. I also had the opportunity to work with database management systems such as MySQL and Oracle XE, learning to design schemas, write efficient queries, and ensure data integrity. Used ESQL to build services implemented in UBA's funds transfer architecture.
- Honing of problem-solving skills, attention to detail, and ability to work effectively in a team environment.

Junior Backend Developer

February 2025 - July 2025

Access Bank – Lagos, Nigeria

- Collaborated with peers to plan and successfully execute community-building programs.
- Skillfully managed administrative responsibilities for the functionality of projects. Received outstanding feedback ratings.

VOLUNTEER ACTIVITIES

Personal AI Project Exploration – Self

March 2025 – Now

- Independently built small-scale AI experiments, including document retrieval and reasoning pipelines, to explore how models handle structured data and multi-step reasoning.
- Critically analyzed outcomes, testing different approaches to improve retrieval accuracy and reasoning efficiency.
- Applied agentic AI principles by designing and iterating on autonomous workflows that coordinate tasks, tools, and decision-making processes to enhance system performance and problem-solving capability.

SKILLS

- AI & Data Science: RAG pipelines, Multi-agent systems, LLM integration, WatsonX Orchestrate, Python
- Backend: Python, JavaScript, Java, C++, ESQL, FastAPI, IBM App Connect Enterprise, Docker, REST APIs, WebSockets
- Database Management - Oracle XE, MySQL, MongoDB, Pinecone, PostgreSQL
- Frontend Development - Html, CSS, Javascript
- Graphics Design & 3D Animation - Blender, After Effects, Canva
- Certification - AWS certified cloud practitioner

INTERESTS

- Videography
- Novels on Human Psychology

LANGUAGES

- English - Expert
- Yoruba - Native
